

Vision Statement & Rationale

Mahindra International school
Updated: May 2017
Version: 1.0

An empowered, innovative and agile community of learners who achieve and contribute positively within and beyond the school

Rationale: A vision provides a compelling future and a basis for assessing the current reality and it provides a sense of direction. Specifically, we need a vision to provide clarity and cohesion regarding our identity and purpose in a dynamic organization.

Definition of Terms:

- **Community of Learners** – there is a sense that all members of our community are on a learning journey and that the inclusive nature of our community supports this process for all.
- **Empowered** – we are empowered when we are making important decisions for our learning and with our learning. We are authors of our process and have a say in our learning.
- **Innovative** – We are innovative if we are trying new ideas that *improve* our learning or our outcomes in meaningful ways. Innovation is problem identification and problem solving.
- **Agile** – Agility is the ability to respond and adapt appropriately to new situations, evolving needs, and changing ideas. It implies life-long learning, attentive observation and the ability to modify self for the circumstances.
- **Achieve** – Achievement comes in many forms – in the school setting it implies growth, development, and mastery according to personal needs and interests. It involves going outside of our comfort zone and persisting. It may involve setbacks along the way, but should also involve successes.
- **Contribute Positively** – We believe that what we do in life impacts people, communities, environments and the world. We share a sense of responsibility and understanding that individuals can and do make a difference
